in Urologic Oncology,
Reconstruction and Stones

February 16th–18th, 2017
Department of Urology
University Hospital of Heidelberg

Neue Aula, University of Heidelberg

Dear Colleagues,

We cordially invite you to the Semi-Live symposium from February 16th to 18th, 2017. For the second time, the beautiful site of Heidelberg welcomes some of the internationally most renowned and experienced experts to present anatomical landmarks and access strategies, important steps, tricks, pitfalls and complication management in urologic surgery. Semi-Live will, therefore, grant you access to the smallest, yet so important details of state-of-the-art urologic interventions.

Semi-Live 2017

- focuses on contemporary urologic procedures for complex and standard endourology, laparoscopy, open and robotics in urology, including breaking news from the ASCO-GU 2017.
- brings together a faculty of international surgeons with highest state-of-the-art experience. Additionally, a heritage session will review the outstanding development in urologic surgery by some of its finest contributors.
- offers HD format presented and narrated to foster a lively and descriptive discussion with the audience.
- provides hands-on-training at half-day workshops in immuno-oncology and laparoscopic urology on February 15th.

We are very much looking forward to welcoming you to Heidelberg.

Best regards on behalf of the organizing committee,

Gencay Hatiboglu
Dogu Teber

Markus Hohenfellner

Workshops

Wednesday, February 15th, 2017

Semi-Live workshops combine a brief theoretical introduction with intensive hands-on-training sessions and case discussions, guided by skilled experts.

As there are only a limited number of places available, reservation will be done on a first-come-first-served basis.

Workshop 1: Laparoscopic Urology

- Partial nephrectomy, zero ischemia technique, different suturing techniques (V-Loc vs. Hem-o-Lok technique)
- Application of ischemia (bulldog clamp vs. tourniquet)
- Laparoscopic pyeloplasty
- Laparoscopic Boari flap/Psoas hitch
- Laparoscopic vessel approach and complication management
- TUR-P, TUR-B

Training sessions will be performed on the pig model and organ packages.

Workshop 2: Immuno-oncologic Therapies for Advanced Urological Cancers

- Current guidelines for metastatic urologic cancers
- Checkpoint inhibition – concepts and mode of action
- Treatment duration, treatment goals and response patterns
- Interpretation of imaging, RECIST 1.1 vs irRECIST
- Clinical actions in the use of checkpoint inhibitors

The workshop will be performed on the basis of lectures and discussions of case reports.
